Jira Implementation Ticket

Overview

Based on the client funnel analysis, a large portion of users drop-off at the date of birth step.

Opportunity: Since majority of users are on mobile devices and ‘tapping’ through the survey, ask for an age bracket in the matching quiz — one tap, no friction.

Objective

AC	GIVEN	WHEN	THEN	FIGMA
US01. As a client, I want to select my age range from a predefined list of options,So that my match results are better tailored to coaches who serve my demographic and life stage. **Pre-conditions:** Client has not yet completed the match survey. **Scope rule:** including a/b flow, inactive flow				
AC-1.1 — Question placement	Given the client is progressing through the onboarding survey	When they reach the birthdate/age step	Then they see a step titled **"What's your age range?"** (replacing the previous month-year input field and any prior birthdate copy).	
AC-1.2 — Option display	Given the client is on the age	When the step renders	Then they see exactly 6 selectable options displayed as option cards (matching the existing survey option card pattern), in this order: • Under 18 • 18–24 • 25–34	
<table>
<tr><td></td><td>range step</td><td></td><td>• 35–44
• 45–54
• 55+</td><td></td></tr>
<tr><td>AC-1.3 - Single selection</td><td>Given the client views the age range options</td><td>When they tap/click one option expect under 18</td><td>Then that option becomes selected

And the image changes based on age range and gender

<table>
<tr><th>Gender</th><th>Age</th><th>Image</th></tr>
<tr><td rowspan="5">Male</td><td>18-24</td><td>  </td></tr>
<tr><td>25-34</td><td>  </td></tr>
<tr><td>35-44</td><td>  </td></tr>
<tr><td>45-54</td><td>  </td></tr>
<tr><td>55+</td><td>  </td></tr>
<tr><td>Female</td><td>18-24</td><td> </td></tr>
</table>
</td><td></td></tr>
</table>

				25-34		
				35-44		
				45-54		
				55+		
			Non-binary/ Other Prefer not to say	18-24		
				25-34		
				35-44		
				45-54		

			55+	
		When they tap/click one option “Under 18”	TBD	
AC-1.4 - No auto-fill	Given the system has a stored birth date for the client (derived from their email/account)	When the age range step renders	Then the system calculates the client's current age and **pre-selects the corresponding range** automatically.	
		When no birth date is on file	Then no option is pre-selected by default.	

AC-1.5 — Data passed forward	Given the client selects an age range and completes the survey	When the survey is submitted	Then the selected age range value is included in the survey payload used for coach matching logic	

Open questions

No	Question	Carly's review
1	The UI is ready for review. There are two options • Question name: What's your age range? • Copy: This help us to tailor training intensity, recovery, and recommendations for you. • Behavior**:** The current behavior is maintained - the image will change based on the selected age range. ◦ The UI offers 2 distinct layouts for age selection: ▪ Link": [MPD] Trainer Match Tool [Client] ▪ Option 1: List View • **Layout:** Vertical list of full-width buttons.	@Carly Bogatz 1. **Copy- approved** 2. **Layout- approved** the Vertical list/full width buttons. This will help reduce fat-fingering versus the other layout. 3. **CB Question: I appreciate the dynamic images for each date range based on the clients gender, however, can we consider a less dynamic approach first to get this out the door faster? What's the engineering difference in level of effort between the 2** @Hien Nguyen (BA)?

	 - Option 2: Grid View / Chip View - **Layout:** Multi-column grid using "Chips"  Please help us review the copy and select the most suitable option. In the previous meeting, LJ provided feedback that the copy should be changed. From my side, Option 1 makes more sense.	
2	Currently, MP supports clients over 18.	@Carly Bogatz

	If a client selects "Under 18," the system should display an error message. In the future, the system will show a banner for clients under 18 and clicking [Got it] to close the survey and back the landing page.  I propose our platform show message: • You must be at least 18 years old to train with an Everfit coach.	Makes sense- pop-up design/copy **approved**
